Truck Shop Sheet Metal

Most panels are E-D-Primer coated and are carefully packaged to protect against damage that may occur during transit. Most parts are individually boxed for damage free shipping. However, after overseas transport & cross country delivery to you, it is likely there could be a small ding or minor scratch. These minor blemishes cannot be helped and are considered normal due to the nature of the product. Test fit all panels prior to paint and installation. Any physical damage in transit must be reported to delivering carrier at time of delivery.

At the sending unit? Short Answer: No

Truck Shop sending units are designed just like the originals from GM.

Sending units do not receive voltage, it "sends" OHM's of resistance to the fuel gauge.

At the fuel gauge? Short Answer: Yes

All fuel gauges receive voltage either 6 or 12 volt. 1947-54 Trucks with original gauges will require the use of a voltage reducer for use on 12 volt applications.
